REVIEW OF TRADE.

A More Hopeful Feeling Noted but No Gredt Change in Business. New Yord, April 24. Bradstreet's tentorrow will say: The feeling is more hopeful at many trade centres, owing to the continued improvement of the denand on retail huss, better weather, generally favorable crop reports and the activity which naturally follows renewed building operations, distribution of implements and farm supplies and attendant activity. More favorable reports come from confinercial travelers reports come from confinercial travelers. Moderate improvement is shown at a few other western nentres, but at most of the larger distibuting points throughout the country the movement of merchandse on the whole shows no material change. While sheding is progressing rapidly in the northwest, trude there is unfavorable. Lach of rain in Floridu is the cause of scarcity of early vegetables and at almost all cities more anticing relatively the most unfavorable reature of the bostings even where the tendency in other directions is toward improvement.

As industrial lines the only marked effunge for the better is in the manufacture of shoes, orders for which have been placed in excess of preceding weeks. Transactions in woll have lucreared moderately, but supplies continue heavy and prices, while aomibutily unchanged, are weak. In Rhode Island fair orders for woolens have been funed with mills. The movement of dry koods continues ausantisfactory, but is improved in retail lines, due to the continued favorable weather.

Prices for cotton goods are depressed by over-production, not deep the definition of the ligher

Rev George W Hinckley, of Good Will Home, is off for a visit to Larry, Va., undertaken parely for a good res and change before commending the arpartly in response to an invitation by the widely known evangelist. Dr. Wharton, to visit a home he is about establishing at Luray, founded on the Good Will Farm's idea, for imperitied boys. Dr. Wharton has in bis control a large property, including quite a number of houses, which he proposes to devote to this purpose. He wants practical suggestions

from a man with an experience like Mr. Hinckley's as to how to organize and run it. This property is near the famous Luray Caverns, in the mountains of Vir-ginia, which Mr. Hinckley will visit. The Aroostook Pioneer hears that Mrs Simeon C. Dike, who lately visited Roulton, let the only child of the man known as W.S. Wiley, whose dead bedy was found in a camp at More, not long ago. The man's real name, it seems, was William H. Whitney, and for thirteen years als doughter had not known of his wherehous, although she had made ingulies in all directions. Mr. Whitney was a native of Beingo, Maine, and went

to California in 1889, remaining there several sears. After he returned to Maine, he resided in Upton for many years, spending most of his time is huntyears, spending most of his time is hunting and dishing. He came to Anosatook ing and dishing. He came to Anosatook county, several years ago, changed his name and lived alone most of the tiole.

About six months ago a man who had come to this county from Upton and that known Mr. Whitney there met and recognized him. He wrote to a prother of Mr. Whitney here. Proposals for Foundations

A WHIG representative saw Mr. Fowmachinery by fire communicated to them er yesterday and had a conversation by the negligence of the defendant corwith him regarding the team Mr Fowler has a high opinion of the players and thinks that they can be selled on for a strong game as soon as they get into good playing trim. The men are all feeling well but naturally are not in muscular condition yet. In the Lawrence game they worked

little harder than they latended and as they had a great deal of running to do in making 19 runs, found their legs lams the next day when they played Harvard In the Harvard game Bruham started in to pitch good ball and blanked Harvard in the first laning. One of the principal new features is a thunderstorm, with a visible tain shower pouring down, and electrical devices used for the lightning. It is said to be one of the most realistic storms ever seen on the stage. The farm-yard, with its wagons, its beebives, its old fashioned well, its rose-rovered cottage and sunny porch are shown, first in the bright sun-light, then under the gloomy conditions of the storm, and the transition is as nat-ural as everything clas in this play. The cast is a particularly strong one this season, it is said, and the double quartotts and choir have been carefully selected. The musical partion of "The Old Homestead" is not the least commendable. All the scenery has been made new since the play was just seen here.

With the power of Nlagura Fulls the greate-telectric power in the whild is generated for the purpose of distributing it to many points Electricians have and that long-listance transmission of electricity is impossible. Nicolai Tealis sid he would prove that it was passible, and the Nlagara Power Company backed him with millions of dollars.

The wonderful exposition of all the newest things in electricity opins in Madison Square Garden May 4 and the electric power generated at Nlagara Falls will be transmitted to New York on ordinary telegraph wires of the Western Union Company it will be made to demonstrate that 470 miles is comparatively nothing for electricity to jump. Then Dr Depew will make the great trial of sending one continuous current around the world, or as nearly around the world as the table lines will fermit His message, laddressed to either E. D. Adams or I. W. Hawler, of the Nlagara corporation, will be telegraphed from Madison Square Garden over 24,000 miles of cable and be received again to the sume room accompanied by the certificates of telegraph managers at the various points of talegraph managers at the various points of the sum to the world of the world a very few minutes, but just how long it is impossible to say.

The message leaving New York will go over the Western Union cable to Peovance, England, thence onwhed to Jiston, and quederneath the Mediterrancian Sea, coming to fry land again at Suz, to just along the framous carist, and then diving under the Red Sea to emerge at Ada. There, borne along by the power of Nagara it will pass under the ludian Deesn to Bombay, across India to Madras, and under water again to Singapoise, on the Malay positionals. If there was a cable arder the Pacific Ocean Dr. Dephy's epigram could make a droute of the world complete by a long dive under the sea to San Francisch; but that cannot be done. So the message will rebbund on its trail, and by running along the east coast of Africa reach Cape Town. Then it will jump to Lisbon again and startscross the Ainatic Ocean to Pernambuco, Brazil. Bouth America will be the last continent touched, and with one more flash under the seas it will be back in New York.

"Dr. Drapow was selected to send this message," said Mr. Hawley, "because his fame has spread throughout the world more, perhaps, than that of any living American. We concluded, too, that if he could not clear the track for a grand flying tour of the world then no one eled could. The various telegraph and cable could. The various telegraph and cable could have have generously extered into the project, and the message will depositance the great powers of electricity in this direction."
